

Class 1 fitness challenge

The Class 1 topic this term is Planes, Trains and Automobiles.

George Stephenson created the first Steam Train.

In 1821, George was asked to be the engineer for the new railway being built, which would run from Stockton to Darlington.

In 1825, the Stockton to Darlington railway opened and it was the first railway for passengers. It could carry more than 450 people and travelled at 15mph.

For our fitness challenge we are going to see how many times we can run the length of the Stockton-Darlington Railway, which is 25 miles.

Please let us know how far you have run, so we can update the class totals.

Thank you and have fun.
